

## Sample LOR for Master's Program

### Letter Of Recommendation

I am writing in support of Mr. Surya Kumar who is acquainted with me since (mention year) in my position of Assistant Professor. I have instructed him in the subject of Principles and Applications of Artificial Intelligence and throughout my interactions with him, I found him an academically strong student.

He is extremely serious about his studies, determined to perform to the best of his abilities, and consistently secured top grades in the subject that I taught him. In addition to his keen interest in academics, his analytical approach is notable as it has helped him significantly in amassing vast knowledge on multiple technologies. While learning a new concept, he concurrently analyzes the explanation being given, looks for the rationale behind it, and eventually not just grasp the concept but also attempts to have a viewpoint of his own on that particular concept. He believes in sharing his knowledge with others, never mind helping his colleagues with what he has learned from his experience, and therefore is respected both by his peers and juniors alike.

Due to his interpersonal skills, he manages to work with ease on a team task and can collaborate well within a diverse team. Additionally, his ability to adapt quickly makes him adept at accommodating changes if needed, and it further assists him in dealing with diversity effectively. Being an extrovert, Surya likes to participate in various extra-curricular activities and has been involved in various events (technical and cultural festivals) and social activities.

Under my guidance, he has completed a research project on diabetic retinopathy detection using deep learning. Considering the fact that this research-oriented assignment required the participant to explore the existing information available, he was equal to the task in terms of formulating extensive research methodology with detailed plans to achieve the aforementioned objective. Working on this project, he strived to make the research as extensive as possible and even included those aspects identified after analyzing the data collected and originally were not part of the study. Overall, I appreciated his meticulous execution of assigned tasks; sound understanding of operational intricacies associated with a research project, and was particularly impressed with his calm demeanor even amidst pressing situations.

In my opinion, this course will provide Surya an exposure to the latest technology trends and developments in the field of (mention stream, e.g. Computer Science), and add to his academic proficiency. Hence, I affirm my recommendation for him.

Dr. Dev Khatri  
Assistant Professor  
ABC College
