

Sample LOR for Master's Program

Letter Of Recommendation

I am writing to recommend Mr. Aryan Rajan who is acquainted with me since (mention year, e.g. 2018) in my capacity as the Professor at ABC College. He was under my tutelage for the subjects of Database Management Systems and Artificial Intelligence and Neural Networks and in our association of (mention number of years, e.g. 2) years, I found him an assiduous student, who has a stellar academic record and is punctual with his submissions.

Academically, he is a distinguished student with excellent grades and over the years has been able to achieve constant yet exponential growth in his performance. He submits his assignment well within the deadline without making any compromise on the quality of work, a rare trait that further attests to his knack of respecting all his commitments, be it attending sessions or completing a given task. In his quest for meeting commitments, he applies various techniques to manage time efficiently and at times even voluntarily work extra hours. As his professor, I have witnessed him managing both academic and non-academic activities and have been extremely enthralled with his positive outlook, time management, and above all, his being so disciplined and organized.

Aryan was under my supervision on a project related to heart disease prediction, wherein he built a machine learning model using SVM and Decision Tree algorithms. For this model, data on age, blood pressure, sugar levels, and cholesterol levels acted as the input to the algorithm and produced the chances of heart stroke. Additionally, he also developed a web application using a flask to interact with the model and was responsible for the final presentation. Preparing the presentation, he strived to create an eye-appealing yet content-rich presentation and made it as comprehensive as possible. During the presentation, explaining the slides in front of the panel with great poise, his reporting was extremely objective and thorough and what impressed me most about his performance, was his articulate expressions and breadth of knowledge in regards to the findings he was presenting. Furthermore, Aryan enjoys exploring new things, is keen to perform well in extra-curricular and co-curricular activities too, and has a special interest in technical events.

I think Aryan nurtures the capabilities and the skill-set, which is a pre-requisite for this course, is equipped with the relevant experience and it will add another dimension to his professional career in the field of (mention stream, e.g. Data Science). Therefore, I strongly support his choice and recommend him wholeheartedly.

Dr. Riya Mehera
Professor
ABC College
