

## Sample LOR for Master's Program

### **Letter Of Recommendation**

I am writing this letter of recommendation in support of Ms. Ishika Bhatia, an electrical engineering graduate whom I have known since 2012-2016 in my position at ABC College. I have taught her the subject of Engineering Drawing and through our academic interactions in all these years, I found her to be a quick learner who would grasp concepts early and is always fervent to implement them practically.

She is an incredibly bright student, always ranked among the top five students of the class and has the potential to handle the rigor of a comprehensive academic program. Despite her sound conceptual knowledge, she is considerate of others and with her great sense of humor can forge amicable work relationships easily. An otherwise jovial person, she is professional in her conduct while participating in group based activities, has been respectful and actively listens to others, as well as put across her opinions and concerns politely. She is approachable, does not mind guiding her juniors frequently consulting her on their academic and career related doubts and owing to her calm personality is well recognized among them. Furthermore, she is extensively energetic in taking initiatives on all her assignments, is ready to take up leadership role and as a leader is willing to share knowledge with her peers to help them achieve the team goal.

Ishika consulted me on an academic project titled, "Generation of Electricity by the Air Core Generator", aimed to develop an efficient system providing higher output from low input of water or air flow, and I have also attended presentations by her. While presenting, she explained the content coherently, created a strong connection with the audience and was widely appreciated for her confident representation of underlying idea. Considering her involvement in hectic academic projects, it is amazing how she still manages to participate in extra-curricular activities ranging from exhibitions to debate and quiz competitions. She has served in different capacities within the Student Council in the academic year 2014-15 and 2015-16, consecutively and was selected for an internship at XYZ. Even though she has proved her ability to concurrently execute the responsibilities whether associated with academic or non-academic assignments, particularly notable is her time management skills as she would always complete her tasks timely without making any compromise on the quality.

I believe this coursework will help Ishika focus on the subjects she finds interesting, allow her to explore applications of Electrical Engineering and coupled with the amenities and profound professors, she would mold her career in a right direction. I therefore recommend her to your university.
