

## Sample LOR for Master's Program

### **Letter Of Recommendation**

I am pleased to write this letter in support of Mr. Kunal Singh's application for further studies at your reputed university. I have known him since third year of his graduation course and taught him the subjects of Database Management Systems, Advanced Database management and Distributed Systems. Basis my observations, I found him to be an assiduous student who possesses a strong desire to do well in academics and has been consistent in scoring excellent grades throughout the program.

He is among the top students of my class; has proven his ability to work well within a team task and employs efficient means to obtain desired results. While he is eager to acquire theoretical knowledge on novel concepts, his lab work is equally admirable and indicative of his determined attitude and dedication towards successfully implementing the theoretical concepts. He is a creative thinker and visualizes things from multiple perspectives, a quality which assists him in solving complex problems and devising pragmatic solutions. Furthermore, often being interactive in group activities, he has regularly contributed with his analytical thought process and innovative ideas and consequently has the reputation for suggesting relevant suggestions on complex issues.

Under my guidance, he has undertaken a group project titled, "Splash Cleaners" to develop a laundry management system online with modules for user management, order management and inventory control which provides an end to end automated laundry operations from taking orders to managing payment. In this project, actively attending weekly follow up discussions, he regularly presented diverse information associated with the project, attentively listened to others and was respectful of their opinions. As a leader, he was approachable, put emphasis on team building and was focused on delivering the project timely. In fact, with his optimal utilization of available resources and proficient planning the final documentation and reports were delivered even before the given deadline.

In addition to academics, his performance in extra-curricular activities too is remarkable and aptly depicts the versatile personality that he is. Whether it is attending an online competitions on MYSQL (conducted on hackerrank) or various events at college level he gives his hundred percent and at times manages these events concurrently with his studies. He has also served as the Head of Inter- Department indoor football club and was the content writer for in-house college magazine, 'Karmanya'.

I believe this course will help enhance his domain knowledge and I am pretty sure it would develop him into an astute professional. I therefore recommend him wholeheartedly.

Mrs. Swati Chawla  
Assistant Professor  
ABC College
