

Sample LOR for Master's Program

Letter Of Recommendation

I am writing this letter of recommendation for Mr. Aniket Chauhan, who is seeking admission to the Master's program at your institution. I have known him since the third semester of his engineering program and instructed her in the subjects of Probability and Statistics, Simulation Modelling & Analysis, and Resource Management. Basis my observations, I can attest that he is a good team player with an optimistic mindset and the capability of assisting the team during critical situations.

He is an industrious student, possesses a tremendous drive to reach his goals and while working on any assignment, diligently pays attention to all the mandates. His management skills reflect a methodical approach that he follows and is the driving force behind his efficient performance as he never misses any deadline and always delivers tasks timely. He can work well with others in a team setting and is always respectful of other's opinions even when they differ from his own. Consequently, he is adept at managing a diverse set of colleagues and with his polite conduct can resolve any differences amicably. Moreover, he is focused on developing a versatile personality, attempts to keep his academics and non-academic pursuits in equilibrium, and participated in various events with a tremendous amount of energy and zeal.

I have mentored him on projects related to the application of lean six sigma indicators in the healthcare sector, a smart vendor recommendation system, and a study on recent trends in smart material. Under my mentorship, he has written multiple research papers too, which were subsequently published in international journals. Working on the aforementioned projects, he conducted an extensive literature review and strived to make the research as comprehensive as possible. Justifying his selection for these projects, he was especially impressive in his role of research assistant and was even promoted as the research lead. During his stint, he has also presented papers in conferences and was impressed me with his presentation skills. I particularly admired his articulate style of speaking while presenting the findings, the strong connection he created with the audience, and further appreciated his coherent explanation and preparedness on the topic.

I believe this course will help Aniket in acquiring in-depth knowledge and a unique blend of modern and practical-oriented subjects offered through the curriculum would help him foster relevant skills for future opportunities. Therefore, I strongly recommend him to the institution.
