

Sample LOR for Master's Program

Letter Of Recommendation

I am glad to share my recommendation for Mr. Kartik Patel in support of his decision to pursue higher studies at (University name). He is known to me via our academic interactions at ABC College, where he is under my tutelage for the subjects of Fluid and Thermal System and Mechanical Measurement and Meteorology. As his professor, the impression that I formed of him was that of a quick learner with just the right blend of innate inquisitiveness and diligence needed to perfectly augment his quest of acquiring significant technical knowledge.

He possesses sound fundamental knowledge with clarity of concepts and is willing to explore beyond the prescribed curriculum to know more about the latest technical advent and their practical applications. An otherwise academically strong student with excellent scores, he initially struggled in comprehending the concepts. However, he was truthful about the issues faced and did not mind seeking advice. Accepting the feedback shared with him constructively, he was prompt in taking the corrective measures and improving considerably eventually managed to rank among the top students of his batch.

Under my guidance, he has undertaken multiple research projects, published technical papers in international journals and was impressive with his meticulous execution of assigned tasks. He smartly approached his work, yet was disciplined while performing his duties and remained well-organized throughout all these projects. In all these assignments, I found him extremely punctual, was pleased to witness him striving for perfection, and needless to say he was able to meet all the expectations precisely.

Actively participating in co-curricular and extra-curricular activities, Kartik has attended various technical events and was the elected student President of the productivity club. In this role, he was comfortable interacting with team members senior to him and displayed the sensitivity required to ensure consensus with them. As the team leader, he gave preference to team priorities, guided his colleagues both strategically and by setting examples, and took the right decisions even in the toughest of situations. Having witnessed the favorable results he has delivered when entrusted with crucial tasks and seeing his sound leadership capabilities, I believe that he is capable of leading the team in any situation, is on his way to don the top roles in the future and would turn out to be an inspirational leader.

I think this course with wider scope for availing opportunities to implement his knowledge would prove beneficial to his personal growth and therefore, I affirm my recommendation for him.

Dr. Rohan Bhatia
Assistant Professor
ABC College
