

Sample LOR for Master's Program

Letter Of Recommendation

It is with immense happiness that I am writing this letter of recommendation for Mr. Rishabh Desai. I have known him since (mention year) and he was under my tutelage for the subject of Numerical and Statistical Methods. Based on my observation, I can attest that he was a creative person with excellent presentation skills and the ability to speak eloquently.

He was attentive in lectures and looked enthusiastic about learning new concepts. His deep understanding of statistical libraries was exceptional and he even took initiatives on his own to build upon the knowledge on various statistical models such as GARCH, ARIMA, ARMA and WAR. The fact that he kept on developing relevant skills and is currently working in quantitative finance further is indicative of him being an avid learner. Additionally, he regularly volunteered for presentations and impressed everyone in the class with his sound acumen and convincing presentation style. Despite having no prior experience in placement coordination, he was confident in his interactions with the hiring managers and it was admirable that he successfully convinced them for campus recruitments.

As a student, he gave equal importance to overall personality development and irrespective of his involvement in academic and project work still managed to brilliantly perform in extra-curricular activities. Throughout the course, he made conscious efforts to participate in various extra-curricular activities and served at multiple student bodies in different capacities. He was the Vice President of (XXXXX) and was involved in organizing intra-college events too. While arranging these events, he was detailed-oriented, prioritized well; and also displayed strong time management to handle multiple tasks efficiently. Apart from his fervent involvement in organizing and coordinating the events, he amazed everyone with his management skills, skillful planning, and remarkable execution. Furthermore, leading the team strategically, he introduced novel approaches within the workflow, if needed, and did not mind pitching in with extra work to assist his team in delivering the tasks within the deadline.

I believe this coursework with a specialization in (mention specialization) perfectly matches up with his desire to explore the field he has shown a keen interest in. It will allow him to delve deeper into the core concepts and would further add another dimension from a career standpoint. I, therefore, recommend him to the university without any reservations.
