

## Sample LOR for Master's Program

### Letter Of Recommendation

I am pleased to write this letter of recommendation for Ms. Ishita Kapoor. I have known her since (mention year) and in my position taught her the subjects of Computer Organization and Embedded Systems, Unix System Programming, Programming with Java, Social Network Analysis, and Mobile Application Development. As her professor, I found her to be a determined student with an undeterred passion towards achieving her goals.

Given her stellar academic credentials, it goes without saying that she was serious about achieving excellent results in academics and even as a student aimed to attain consistency in overall performance. Despite being a class topper, she was attentive in lectures, actively listened to the instructions and explanation given and was polite in her conduct. In classroom activities, she was methodical in her approach, diligently executed the assigned tasks and came across as an optimistic individual. Complementing her positive outlook aptly was the enthusiasm she displayed in acquiring in-depth knowledge and was equal to the task of putting in sincere efforts for achieving desired results. Furthermore, just like her performance in academics, her lab work is comprehensive too and I cannot but admire her ability to successfully implement various theoretical concepts pragmatically in a real-world scenario.

Under my supervision, she has undertaken multiple projects including notable projects such as Facebook page liking System for Netflix page and 'Facial Recognition using Java'. I have also mentored her on assignments involving developing mobile application ('BMS College Hostels') and presentations (Security in Unix Systems - UNIX course, 'Architecture of Advanced Micro devices - COES course). For these presentations, she conducted extensive research to identify relevant content and regularly consulted me on the selection of the content to make the presentation more impactful. While presenting, she spoke articulately with impeccable control over her diction and impressed everyone with her presentation skills as she successfully conveyed the ideas associated with the topic in detail. Participating fervently in extra-curricular activities Ishita is involved in varied technical events and has attended various workshops on Mobile Application Development, Software Development process, and Importance of Social network analysis.

In my opinion, this course with a unique blend of comprehensive curriculum and practically oriented subjects will prepare Ishita well for the future opportunities and contribute to her development as an engineering professional. I therefore, wholeheartedly recommend her as a potential candidate for admission at your esteemed university.

Mrs. Kavita Chawla  
Assistant Professor  
ABC College
