

## Sample LOR for Master's Program

### Letter Of Recommendation

I am writing to recommend Mr. Karan Kapoor as he intends to attend (University name) for pursuing (course name). I have taught him the subject of Biochemistry and recognize him as an excellent team player who possesses sound communication skills and has a keen interest in academics.

He is extremely serious about his performance in academics and consistently scored good grades in the subject that I taught him. His attention to detail is incredible as he actively listens to information being shared in the class and raises genuine queries to clear his doubts. He submits his assignment well within the deadline without making any compromise on the quality of work, a rare trait that further attests to his knack of ensuring punctuality in all his commitments, be it attending sessions regularly or completing a given task. He is a firm believer in teamwork, often shows the intent to support his team members, and has been a key member of any team that he is part of. Since he has been successful in achieving desired results whenever given the position of responsibility, I think that he is capable of leading the team in any situation, and witnessing his sound leadership capabilities am convinced that he would eventually become a top leader.

He was under my guidance on his final year project titled, "Diabetic wound healing by nanoparticle" and closely monitored his performance in various academic activities, wherein his class participation was full of zeal. Performing on diverse projects, with his strong interpersonal skills he was able to maintain cordial partnerships with others and was widely admired for his helpful conduct. Moreover, he regularly volunteered for presentations in the class, especially on novel topics, and impressed everyone with his sound technical acumen, convincing presentation style, and concise yet effective explanation of the topic.

During my association with him over the years, his avid interest in co-curricular was also revealed to me, and some of his notable initiatives in this sphere include an internship with a startup, "Multisols", and multiple courses he completed on the topics of Industrial biotechnology on his own.

Being a versatile personality, he is further involved in many technical and non-technical events (paper presentation and poster presentation, seminars, debate) and served in different capacities at the department of biotechnology.

I think Karan nurtures the capabilities and the skill-set, which is a pre-requisite for this course, and this coursework will further add another dimension to his professional career. Hence, I affirm my recommendation for him.

Dr. Aman Khurana  
HOD,  
ABC College
