

Sample LOR for Master's Program

Letter Of Recommendation

I am pleased to write this letter of recommendation for Mr. Pranav Rao whom I have known since (mention year). I have instructed him in the subjects of Enzyme Technology, Cell Biology, Genetics, Plant Biotechnology, and Total Quality Management, and through our academic interactions found him a creative person with a strong desire to learn and execute his tasks confidently.

He is an avid learner with quick grasping abilities and an innate interest in acquiring comprehensive knowledge on the application of learned principles. Managing varied levels of responsibilities with minimum guidance, he is capable of working independently as well as buoyantly as part of the team. His performance during the group activities is marked by his strong interpersonal skills and how he confidently communicates his ideas to his fellow students. Over the years, he has proved himself as a strong leader who encourages participation from his team member and considers individual perspectives while making decisions. Furthermore, his polite and soft-spoken personality allows him to work well with others in a team setting, as he always respects others' opinions even when they differ from his own. Being his mentor, I admire his selfless contributions to the team cause and, he in particular, impresses me with his networking skills and an ever-growing quest for developing himself as a resourceful person.

As the academic coordinator, I have mentored him on a model for the genetics ETL paper on the topic of neurotransmitters and numerous class assignments and presentations for the subjects of plant biotechnology, enzyme technology, and total quality management. I have also instructed her in the practical sessions during which he caught my attention with his sound understanding of technical concepts, innovative thought process, and positive attitude towards learning new things. In the experiments, he exhibited looked to implement learned principles precisely and made concurrently put in sincere efforts to ensure that all the duties assigned to him were performed diligently. Further, he significantly stands out in regards to his determination as he never shies away from taking up difficult assignments and is ever willing to test the depth of his skills.

On a personal level, Pranav is a well-rounded person and has an affinity for extra-curricular activities too. He has a special interest in technical events, has attended multiple webinars, and also takes up relevant courses outside the prescribed curriculum.

In my opinion, this course will help Pranav in gaining industry insights in the field of his interest and would further enhance his knowledge and skills. I, therefore highly recommend him to the institution.

Dr. Yash Khanna
Assistant Professor
